

PLEASE---Do not allow any changes in the current telephone privacy act in Indiana!!!. We are retired folks and find these calls very offensive as well as intrusive!!!. We have had as many as four calls in one evening and several more in each week. Most of the callers are rude and intimidating---asking for my husband by first name, refusing to identify themselves, continuing to insist on completing their script even though we asked them not to continue and recalling after we hung up on many occasions. Please do NOT change the law.
